From the Chambersburg Franklin Repository.

COMMUNICATED.

There has been exhibited within these two or three days a Lusus Naturæ really surprizing—a female Negro Child, with a whiteness of skin which extends over part of its head, spreads over its breasts and covers its legs and thighs down to the ancles. This child which according to its keeper, was born in Virginia, of black parents, and is about two years of age—at first sight may be considered an Albino: but upon minute inspection, appears to be a phenomenon of nature, in generis, and as far as my reading extends a nondescript. The negro Albinos are of two kinds; such as are perfectly white at their birth, and such as become so by gradual destruction of the black color of their skins, commencing from a white spot somewhere exhibiting itself, and thence extending all over the body. Both kinds of Albino's or white negroes, born of black parents, are not uncommon in Africa, as well as elsewhere.

Such as are born white are always of a delicate frame and constitution, with a skin devoid of that natural reddish tinge which characterizes the child of white parents and having a milky white or morbid appearance, like the a skin of a dead body. Their hearing is bad, their vision too is extremely weak, and unable to bear the light of the sun, but it is highly serviceable in the deep shade of the forest or the darkness of night.

This strange and unaccountable peculiarity of the constitution of the human race, is not confined to the natives of Africa alone: it is not uncommon in the islands of Ceylon and Java, and all the countries of those latitudes. Saussure and other physiologists have described it as occurring in Europe and America, (vide Encyclopedia, article Albino—14 vol Med. Rep.) The European Albino, besides the extreme delicacy of frame, constitution and vision, which distinguishes the African Albino, is described as possessing a fiery cast of the eye—a redness supposed to be owing to the great impulse of the blood into the relaxed vessels of that organ. (Nide Encyclopedia, article Albino.) The production of the Albino has always been considered as the effect of disease, and has been attributed by one to a vitious secretion in the skin, and to a deficiency of the pigmentum megrum of the eye (vide Blum. Phys.) by another to an entire absence of the rete mucosum: by a third to the dead whiteness of that substance, and by Buffon to an exertion of nature to recover a white colour, which he supposes to be the natural and primitive colour of man, however it may now be modified by climate, manners and aliment.

The negro child exhibiting in this place is distinguished by none of these peculiarities which mark the Albino: Its form, its hearing, its eyes, are as good as usual with other children, except a bluish tinge which pervades the white of the eye, and which may, perhaps, be common to young negroes. The black part of the skin is as black as thd common run of negroe's skins: the white part of the child's skin is not to be distinguished from the most delicate white skin, exhibiting that natural florid appearance, which distinguishes the white person from the Albino: & distinctly transmitting the blue color of its little veins; its thighs, legs and arms are interspersed with small, well defined black spots. The child remains as it was born, exhibiting no increase of the whiteness of the skin, as is the case with Albinos. The hair on its head that covers the white skin, is like the driven snow, whilst the rest is like that of the natural negro.

THE ECCENTRIC VOYAGER.

To the Editors of the N. Intelligencer.

Gentlemen—Some late letters from the Mediterranean have put me in possession of the enclosed information of the Princess of Wales. I send it to you, use it as you may think proper. It may amuse some of your readers.

Very respectfully, &c.

Washington, October 29.

THE PRINCESS OF WALES.

On the arrival of the Princess of Wales at Tunis in a small polacre, which she had chartered for the purpose of visiting the different parts of the Mediterranean, she was escorted to the British consular house by the consuls of the different nations residing there, when a bow from her royal highness informed them she wished to be alone. A few days after she received their visits.

"Her dress was of a scarlet velvet, richly trimmed, cut lower before and behind than it would be decent to name, and descending only to the knees, with sleeves about two inches long; her legs were covered with a pair of red Morocco Boots, which came above the knees: on her head she wore a kind of Bonnet made of purple velvet and scolloped to resemble a crown, with 3 Ostrich feathers, about 18 inches long.

"She is remarkably fat and short: laces herself up very tight with corsets, wears her breasts, her arms, and her back very much exposed, paints to excess, wears a wig, which is curled at the sides nearly as high as the top of the bonnet, artificial eye brows, nature having denied her any, and false teeth.

"Her suit consisted of a German Band on about 6 feet 3 inches high, and every way proportioned, whom she had taken from the ranks of some German regiment, an Italian count and countess, the latter young and handsome: two officers of ordinary appearance and manners, a band of music, and a few domestics.

She appears very ignorant and coarse in her manners, and indelicate in her conversation. She made many inquiries respecting America, and, among others if it was not very hot in Canada? And was also very much surprised to learn that it was also sometimes cold. She walks, bows, twirls her stick, and gesticulates like a man; and, after visiting the Harem, spoke of the customs there without reserve. As regards her husband, she said that he had in some respects a stronger claim to the title of Grand Seignor, than any other man in the world.

"She visited the ruins of Carthage and although the Bey offered her his carriage, she preferred riding on a jack ass with one slave leading, another driving him along. The Italian Countess rode a straddle, on horseback, having short petticoats and loose pantaloons. The other attendants were some on horses, some on mules, and some on asses, followed by an immense rabble of Turks and Moors, who were attracted by curiosity to see this procession.

"Her Royal Highness talks of visiting the U. S. as she has a great desire to become acquainted with the Americans having never seen but one 'real one' in her life."

Baltimore. Nov. 6.

Extract of a letter, dated Madeira, September 27.

"Business is dull in the Island, there being very few American arrivals.

Indian corn per bushel, 8 2 a 2 50; wheat per bushel. 2 50 a 3; rice per 112 lbs. 7 50; flour, fine, per barrel 18; seconds per barrel, 16; brandy, French oil proof. per gallon, 1 80 a 2; do Spanish 1 55 a 1 60."

Extract from a citizen of Baltimore to his friend, dated

"*Port-au-Prince, Oct. 15.*

"Last Thursday was a great day with the Indigenes, as Petion was installed President for life of this part of the island. A general salute was fired at the rising of the sun. At nine o'clock, about ten thousand were on parade, well dressed and armed: their cavalry more particularly looked extremely well. The commercial foreigners here having received an invitation to join in the procession, we proceeded from the consul's house, headed by himself, to the senate house where we were handsomely received by an aid de camp of Petion, who assigned us a situation from whence we could see every thing interesting. A few senators were present, and the whole body does not number more than nine: a great number of people came to see the installation; but I have never witnessed more order than was preserved throughout the day; not a single instance of a multuous disposition having been shewn. At twelve o'clock the President made his appearance accompanied by his principal generals, who were dressed in very rich and costly habits; he was conducted to a chair opposite to the President of the Senate, who after a short pause rose and addressed the assembly, and as well as I could understand he commenced by entering at full into the revolutions and changes which this unhappy island had been subject to since the French revolution, and from the first emancipation of the people here until the present period: he descanted at length upon the character and actions of Petion since he has had the direction of their affairs; he exalted his name for his mildness and benevolence, and for the many good deeds he had done: he enumerated the benefits he had conferred upon this people by changing their character, which had been unfixed, and converting it into something like order and refinement: he stated that the people, impressed by his many virtues, had upon mature reflection, conferred upon him the supreme authority, creating him President for life, and which authority is only to be restrained by the Senate and the Constitution. Petion's answer was short and pertinent, he acknowledged the honor his country had conferred upon him, and felt grateful for this last testimony of unbounded confidence: than holding up his hand he gave his assertion of honor that he would do every thing for the happiness and benefit of his country and people. When he sat down, there was a general acclamation of the soldiery and people, accompanied by a general discharge of artillery from the forts and his ships in the harbors. We then left the senate house and proceeded to church, about an half mile through a file of soldiers: te deum was sung at the church: another discharge was fired, and we then dispersed. In the evening there was a general illumination, firing, &c. I have endeavored to give a general idea of the occurrences of the day, as it is not every day that such events take place, and small as it may appear in the United States, I assure you it has done honor to the people here."

Extract of a letter dated Liverpool Sept 18th, 1816.

"Since our quotations of the 14th, the cotton market has continued flat, and sales have been made from a 1-2 to 1d per lb. reduction on the price quoted—We apprehend, they will continue to recede, and nothing but a total dispersion of imports, can now rally them. The other prices are steady.

"Uplands 17¼d. a 23¼d—Orleans 18d a 22d—Sea Islands 38. 2s. a 2s 2d—Ashes 53s. a 64s—Rice 4 8s a 44."

[Communicated for the Federal Gazette.]

Extract of a letter, dated 28th August, 1816, from a respectable House in Amsterdam, to his correspondent in Baltimore.

"Maryland Tobaccos have lately got into a state of brisk demand, and considerable sales have been effected at prices from 1-2 to a 1 stiver higher than our last advices; unless larger quantities than we have a right to expect, arrive it must still advance materially higher. The better qualities of Ashy are much sought for and are carce, the new crop is depressed and sells slowly at considerable reduce prices. It is much to be regretted that the shippers of Tobacco pay so little attention to the age & condition of the article when shipped, and thus it is that almost every shipment as a proportion of new grown stuff that comes to our market either rotten, or the color entirely changed from what it might have been when shipped. I advise you to be cautious and not ship any Tobacco that has not been well qualified, one that is put up in the winter or spring months fair fine, I advise you not to ship any Tobacco until May and June operations, the latter the better, then there is some security that its order and condition will be such as to stand a sea sweat, and come to our market in proper condition—so much injury has been already sustained by the shippers in not attending to this precaution, that you cannot be too careful—Tobaccos that are yellow and look well to you when shipped of the new crop and not properly qualified, arrive here quite changed in color, and often in a state of fermentation, and much of it entirely rotten. The same remarks equally apply to the Virginia and all other descriptions of Tobacco—The heavy losses experienced by those who in the rage of speculation that existed in your side made shipments of new Tobacco, will amply confirm our statement, and it is with a view to prevent you from falling into a similar error, that we give these precautions. We think our markets for old Tobacco will improve during the Fall and Spring sales, and there cannot be a depression of good sorts until your new crops begin to arrive in large quantities, which cannot be the case until the middle of the next year, and our present stocks are so small that they will be run off before your next crop can come fairly into our market. A cargo has been sold at 8 3 4 for scrubs, and eleven stivers for the better sorts average, and we expect sales will go higher in the Fall and Spring, for good old Marylands, which are scarce.

LIVERPOOL, Sept. 14.

"Our Cotton market continues very dull—the wind having been favorable for importations since our last, the arrivals have been upwards of 7000 bags, including those not reported last week, and the trade have held back from purchasing under an idea that prices might recede a little.—The sales have consequently been very limited, and a decline has taken place in most descriptions of 1-4d to 1-2d per lb. The following are the particulars of the sales made:—850 Boweds at 13d to 18 1-2 for brd to fair, and 18 3 4d to 20 1-2d for good fair to very good; 290 Orleans at 19d to 23d for fair to good; 180 Sea Isls. 2s 2 1-2d to 2s 6d for fair to good, including stained at 2s to 2s 6 1-2d."

NAPLES, Aug. 28.

The Minister of Foreign affairs has delivered a note to the Foreign ministers, on the pretentions of the Americans. Art. 72 of the act of the Congress of Vienna, to which the U. S. appear to wish to refer, stipulates only for the Netherlands, and cannot be applied to the kingdoms in which the legitimate Sovereigns are restored. None of the F. Ministers have replied. They send Couriers to their Courts The Duke of Sorta is said to have gone to Russia. Our Govt. has conducted the negociation with moderation. The notes of Mr. Pinkney have become more moderate. The cession of a port is still spoken of. The pretensions of the U. States will be opposed by all the Sovereigns,

ALEXANDRIA.

SATURDAY, NOVEMBER 9.

The Legislature of Connecticut have appropriated the 145,000 dollars due that state from the U. States, for advances made during the late war, as follows.—One third part to the use of the Presbyterian denomination of christians, for the support of the gospel, one third part to the Episcopalians for the support of a Bishop one eight to the Baptist Society; one twelfth to the Methodist Society; & one seventh to Yale College—The remainder, if received, to remain in the Treasury till the next meeting of the Legislature.

The London Courier of the 19th Sept gives the following article:—

"The re-establishment of the Jews, as a Nation, is the subject of a Letter from Cairo.—Babylon and its environs, as far as Libanus, are the Theatre of great events. A Jew, of the tribe of Dan is said to have collected a prodigious number of disconted Jews—two hundred thousand. Nothing checks his progress.—He calls himself the King of the Jews, and the People name him Hosiannah Maseas. Musselmen quit the standard of Mahomet to fight under the Lion of Juda. The Porter has been informed of the progress of the conqueror, but is not able to arrest it."

Of Bonaparte.

By late arrivals in England from St. Helena, the government had received official advices of the situation of Napoleon Bonaparte in that island. He continued to enjoy health, and was settled down in a quiescent, methodical way of living at Longwood; sees little company, and never goes beyond his interior bounds. He is constantly attended by Count Las Casas. Marshal Bertrand, with his wife and family, live four miles from Longwood.—Madame Bertrand was greatly afflicted at the news of the condemnation of her husband to death, by the French Court Martial; as it frustrated all her plan of returning to France for the education of her four children.

Bonaparte sometimes indulges in pleasantries. The following is an instance. The captain of the British 50 gun ship Newcastle was introduced, and the Ex Emperor made very minute inquiries as to her tonnage, weight of metal, &c. On being told she carried 24 pounders, and 42 pound carronades, he asked, "What chance would you stand with a French 74?" If it was blowing hard, answered the Captain, so as to prevent her opening her lower ports, we could take her, not otherwise. How, long, continued B. do you think you would be in taking a large 38 gun frigate? Do you mean French continued the captain. Napoleon smiled and said, no "*American*"—About ten minutes was the answer; on which the Ex-Emperor laughed heartly, bid adieu, and mounted his carriage, which was waiting for him.

SALT IN TENNESSEE.

We congratulate the citizens of E. Tennessee on the late discovery of an inexhaustible quantity of salt water, of the first quality. It is thought by some, to be next inferior to King's. The company, composed of Judge Powell, Gillenwaters, Wilson and Looney, have succeeded beyond their most sanguine expectations in procuring this invaluable article. The works are situated on Poor Valley Creek, about nine miles north west of this place. An attempt to procure salt water, was made at this same lick, by a Mr. James, about twenty years ago, but after penetrating the rock 70 or 80 feet, he abandoned it. The present proprietors have bored upwards of two hundred feet further, and struck 25 or 30 veins of salt water, which will enable them to supply at least all East Tennessee, with plenty of salt. The benefits we shall derive from this grand discovery, are incalculable. The immense sums of money paid by the citizens of this state to Virginia for salt, will now be saved. It will also render us independent of Virginia. The company deserve great praise for their public spirit and perseverance.—*Rogersville Gazette.*

LEGAL REFINEMENT.

The coroner's inquest having set on the body of a young man, who hanged himself in a fit of love Phrensy, brought in their verdict, "died by the visitation of CUPID."

STRANGE REVERSE.

It appears by the public prints, that the people of this country now find it profitable to import Indian corn from the West Indies. How long is it since the wise managers of our national affairs, with presumptious self importance, undertook to shut the ports of these United States against the exportation of corn and other provisions for the purpose of compelling the nations of the world and especially the English to humble themselves before them. How confidently was it predicted by the supporters, and place-men and printers of these managers, that this strong measure of the administration would bring England on her marrow bones," or "starve her manufactures and her West India colonies." Behold the wisdom of the measure!—It taught the West Indians to seek within their own Islands for the means of subsistence, and they found an ample resource in the cultivation of corn. To those whom but a few years since, we thought to starve, by withholding the excess of our produce have we now to apply for bread. Is not this judgement from the hands of providence, to teach humility to a nation which had prefered for its rulers the servants of Napoleon Bonaparte, and the deciples of Thomas Paine?

Trenton Fed.

New-York, Oct. 5.

In the Gazettee yesterday, we mentioned, by mistake, that the prize crew found on board the Spanish brig, re-captured from the pirates by the Tom-Bowling, had been put in an open boat fifteen leagues from the land—Not so. The fact is, that the pirates, who first captured the brig, put the Spanish crew adrift in an open boat, fifteen leagues from land, without provisions but they providentially reached N. Orleans.

The Boxer had been previously ordered to New York; but in consequence of being worm eaten at the waters edge, was sent to N. Orleans for repairs, and was to sail for this port about 10 days after the Saranac.

November 6.

Important as far as it goes. A letter from Naples, of the 22d of August, observes, "The demand made by Mr. Pinkney on the king of Naples, have, I understand complied with, the king agreeing to pay to the U. S. the sum of 300 thousand dollars. This business being settled, and all the American squadron, except the schooner Hornet, being now here, it is supposed the fleet will sail in the course of three or four days for Messina: from thence to Syracuse, then visit the Barbary States, and proceed to Gibraltar, to make arrangements for sending one of the ships home with dispatches, and to carry home the men whose time of service has expired."

On the same subject, a letter from Leghorn, of the 3d of September says." There are different reports in town respecting the success of Mr. Pinkney's mission to Naples. Our American and English correspondents state, that nothing is likely to be done—while Italian houses say the differences are adjusted; the Neapolitan Government having agreed to pay at three stated periods, 1, 500 000 ducats. It is certain the fleet is on the verge of going away, as also Mr. Pinkney."

A stumm Orator in Virginia, was once beating the air most furiously, and telling his hearers a deplorable tale respecting certain measures that had been suggested, which, he said, would be fatal to the liberties of the people. &c. when his "Overseer," interrupted him, to inquire, how Muggs, Jack, Cuff, and Toney, should be served for stealing some corn. "Cut off their ears, and give them fifty lashes a piece," said the sturdy champion of human rights, "and I will see further about it when I have finished my speech."

The old Dutch Woman—a fact.

To a man who has one foot in the grave, & feels the ground giving way under the other, a "hope of the resurrection of the dead," is his highest hope. On Wednesday a skeleton from on board Bohlen's brig now laying before our city passing through our market, stopped opposite to a tub of vegetables, cast her eyes upon a head of sallad, with a countenance of distress. A plain looking man of half my age, reached out his hand, and put two of those heads into her apron, & added, also, two heads of cabbage, and two bunches of beets, and addressing the owner, asked the price of them—She replied with a serious smile, "You paid me for them when you gave them to that poor woman; it did my heart good, and I have yet plenty!" I saw that this woman had a soul: Yes, a soul to be saved.

EPIGRAM.

The following Epigram was occasioned by Miss H's elopement from Oxford with her footman, at the time of a gentleman, called by the wits of the university Dr. Toe, from his peculiarity of walking, was paying his addresses to her.

Twixt footman John and Dr. Toe
A rivalship befel,
Which should be the happy beau,
And bear away the belle.

The footman gained the lady's heart,
And who can blame her? No man!
The whole prevail'd against its part,
'Twas Foot-man versus Toe man.

The tract is computed at

Three thousand three hundred and seventy Acres,

and is divided into three farms, with Woodland and Meadows, conveniently distributed for each. There is a

Valuable Mill Seat,

with stone on the spot for building.—The stream is abundant, and waters the whole tract, presenting an extent of

Four or five hundred Acres of Low Grounds

of first quality.—The high land is well divided into regular fields, some of them very productive, and is adapted to the use of Plaister. Few tracts can possess greater advantages either for extensive grazing or grain culture.

The purchaser or purchasers of the land, can be accommodated with the farming utensils, the crops of Corn and the sown Wheat—the stock of Cattle, Horses, Sheep and Hogs; and with the Negroes on the estate in families, making about 150, of a very valuable description, with some tradesmen.

The improvements are a comfortable Dwelling House, with good out Houses, Ice House, Stables, &c. The situation is healthy and the water uncommonly good. Two thirds of the whole purchase money will be required at the delivery of the property, the balance in short payments with interest and secured by a deed of trust.

JAMES KENNEDY & SON,

BOOKSELLERS, KING STREET,

Have just received from LEE'S PATENT MEDICINE Store, No. 46 Maiden Lane, N. York.

A FRESH SUPPLY

Of the following genuine Medicines.

For the prevention and cure of Bilious and Malignant Fevers, is recommended

Hahn's Anti-Bilious Pills.

THIS Medicine has been attended with a degree of success highly grateful to the inventor's feelings, in several parts of the West Indies, and the Southern & Middle States, particularly in N. York, Philadelphia, Baltimore, Petersburg, Richmond, Norfolk, Edenton, Wilmington, Charleston, and Savannah. The testimony of a number of persons at each of the above places can be adduced, who have reason to believe, that a timely use of this salutary remedy has, under Providence, preserved their lives, when in the most alarming circumstances.

Facts of this conclusive nature speak more in favour of a medicine than columns of pompous eulogy, founded on mere assertion.

It is not, indeed, presumptuously proposed as an infallible cure, but the inventor has every possible reason that can result from extensive experience, for believing that a dose of these Pills, taken once in every two weeks during the prevalence of our bilious fevers, will prove an infallible preventative; and further, that in the earlier stages of those diseases, their use will very generally succeed in restoring health, and frequently in cases esteemed desperate, and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by persons in every situation, and of every age.

They are excellently adapted to cary off superfluous bile & prevent its morbid secretions—to restore & amend the appetite—to produce a free perspiration and thereby prevent colds which is so often of fatal consequences. A dose never fails to remove a cold it taken on its first appearance—they are celebrated for removing habitual costiveness—sickness at the stomach and severe head-ache—and ought to be taken by all persons on a change of climate.

They have been found remarkably efficatious in preventing and curing disorders attendant on long voyages, and should be procured and carefully preserved for use by every seaman.

HAMILTON'S WORM DESTROYING LOZENGES.

Which have cured an immense number of persons of both sexes, of every age, and in every situation, of various dangerous complaints arising from worms, and from obstructions or foulness in the stomach and bowels.

This medicine bears no analogy whatever to others of similar titles so commonly complained of, as operating with violence; on the contrary, a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent, and is also mild in its operation, cannot injure the most delicate pregnant lady or the tenderest infant of a week old, should no worms exist in the body; but will, without pain or griping, cleanse the stomach and bowels, of whatever is foul or offensive, and thereby prevent the production of worms, and many fatal disorders. The lozenges are particularly efficacious in carrying off all gross humours and eruptions, feverish and bilious complaints, and are the safest and mildest purgative that can be used on any occasion.

DESCRIPTION OF WORMS.

And the symptoms by which they are known:

Worms which infest the human body, are chiefly of four kinds, viz.—The Teres, or large round worm; the Ascarides, or small maw-worm; the Cucurbitina, or short, flat, white worm; and lastly, the Tænia, or tape-worm, so called from its resemblance to tape. This is often many yards long, and is full of joints. It is most hurtful and most difficult to remove.

Among the symptoms attending worms are—disagreeable breath, especially in the morning; bad and corrupted gums; itching in the nose, and about the seat; convulsions, epileptic fits, and sometimes privation of speech; starting and grinding of the teeth in sleep; irregular appetite, sometimes loathing food, and sometimes voracious; purging, with slimy & fœtid stools; vomiting; large and hard belly; pains and sickness at the stomach; slow fever, with small and irregular pulse; a dry cough; excessive thirst; sometimes pale and unhealthy countenance, and sometimes the face bloated and flushed.

Persons afflicted with any of the above symptoms, should have immediate recourse to Hamilton's Worm Destroying Lozenges, which have been constantly attended with success, in all complaints similar to those above described.

A dose of this medicine given occasionally during the warm seaeon, will effectually prevent "the vomiting and purging of children"—a dreadful disorder, which annually destroys thousands of the infant part of our citizens. it is likewise the mildest and most certain remedy known, and has restored to health and strength a great number, when in an advanced stage of this fatal complaint. Particular and plain instructions are given for every part of the necessary treatment in such cases.

Children generally take this medicine with eagerness; having a pleasing appearance, and an agreeable taste.

Hamilton's Essence and Extract of Mustard.

A safe and effectual remedy for acute and chronic rheumatism, gout asthmatic gout, palsy, lumbagoo, numbness, white swellings, chilblains, sprains, bruises, pain in the face and neck, etc.

The Genuine Persian Lotion.

So celebrated among the fashionable throughout Europe, is an invaluable cosmetic, perfectly innocent and safe, free from corrosive and repellant minerals, (the basis of other lotions) and of unparralled efficacy in removing blemishes of the face and skin, freckles, pimples, inflamatory redness, scurfs, tetters, ringworms, sunburns, prickly heat, &c. The Persian Lotion operates mildly, without impeding the natural, insensible perspiration, which is essential to health, yet its effects are speedy and permanent, rendering the skin delicately soft and smooth and improving the complexion.

The Restorative Powder for the teeth and Gums.

This excellent preparation comforts and strengthens the gums, preserves the enamel from decay, and cleanses and whitens the teeth, by absorbing all the acrimonious slime and foulness, which suffered to accumulate, never fails to injure and finally ruin them.

Hamilton's Grand Restorative,

Is recommended as an invaluable medicine for the speedy relief and permanent cure of the various complaints resulting from dissipated pleasures, juvenile indiscretions, residence in climates unfavourable to the constitution, the immoderate use of tea, frequent intoxication or any other destructive intemperance the unskilful or excessive use of mercury, the diseases peculiar to females at certain period of life, bad lyings in, &c.

HAMILTON'S ELIXIR.

Sovereign remedy for Colds, obstinate Coughs, Asthmas, sore throats, an approaching Consumptions, and most disorders of the breast and lungs.

Hahn's genuine Eye Water.

A sovereign remedy for all diseases of the eyes, whether the effect of natural weakness or of accident.

Toothe Ache Drops.

The only remedy yet discovered which gives immediate and lasting relief in the most severe instances.

Lee's Ointment for the Itch.

Warranted an infallible remedy at one applicaiion, may be used with perfect safety on infants a week old, not containing a particle of mercury or any dangerous ingredient whatever, and not accompanied with that tormenting smart which attends the application of other remedies.

Lee's Infallibe Ague and Fever Drops.

For the cure of agues, remittent, and intermittent fevers.

Han's true & genuine German Corn Plaister.

☞ At the place of sale pamphlets may be had gratis, describing cures performed by the above medicines; the number, importance and respectability of which, fully justify every article of this advertisement.
